DETAILED ACTION

Drawings

1. The drawings are objected to because:

a.) In Fig. 3, examiner suggests applicant label element 13, " data processing system " as referenced in specification.

b.) In Fig. 4, examiner suggests applicant label elements 43, 44, 45; " data processing system ", "cpu", and "storage", respectively as referenced in specification.

c.) In Figs. 4-7, the items contained need to contain a text label. It is office policy to request from applicants that submitted figures contain both text and numerical labels to allow individuals viewing each figure to be able to determine the designation of each element in the figure without having to go into the specifications.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "**means**" and "**said**," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 2634

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because Examiner suggests applicant delete line 20.

Correction is required. See MPEP § 608.01(b).

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

5. Claim 5 is objected to because of the following informalities: Line 4 of the claim reads where ID is the said kernel. ” This wording is ambiguous. How can one single ID be regarded as a kernel, when applicant’s equation on line 3 above reads “ a function of this said ID ($|f(ID)|$). Applicant’s specification on page 16, line 4, references ID as the unique identifier of the mobile stations.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2634

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

7. Claims 1 –9 are rejected under 35 U.S.C. 112, second paragraph, because the claim fails to articulate how each step is incorporated in order to support the method of generating a cyclic sequence of frequencies. The claims appear to be all function language.

Allowable Subject Matter

8. Claims 8-10 are allowed.

9. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

10. Claims 2-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter:
The instant application discloses a method for generating a sequence of frequencies in a wireless environment. Prior art references show similar methods but fail to teach a sequence of indices being derived from a kernel, updating the list dependent upon a part of a previous selection along with the remaining limitations of the independent claims.

Art Unit: 2634

Conclusion

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence B Williams whose telephone number is 703-305-6969. The examiner can normally be reached on Monday-Friday (8:00-5:00) being out of the office every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 703-305-4714. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-872-9306 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4750.
